A escolha dos instrumentos faz parte do planejamento da cirurgia e deve ser feita através de uma solicitação formal do profissional de saúde, que deverá especificar a técnica a ser utilizada, as características do implante a ser empregado e os detalhes dos instrumentos a serem utilizados. É fundamental inspecionar cuidadosamente cada peça para garantir que esteja em condições adequadas de uso e limpeza. Rever a técnica de instrumentação cirúrgica antes da realização do procedimento contribui para a eficácia da cirurgia.

b. Intra- operatório:

Os instrumentos são designados exclusivamente para auxílio médico e nunca devem ser considerados parte permanente dos implantes após a cirurgia. Devem ser cuidadosamente escolhidos e ajustados especificamente para o dispositivo a ser implantado, garantindo a correta adaptação do implante ao local da cirurgia.

8. PRECAUÇÕES

- Não retrabalhar uma broca, pois, isso afetará a função específica de seu uso alterando suas dimensões gerais. Logo, qualquer retrabalho poderá causar desgaste excessivo, descaracterizando sua função, tendo como consequências grandes prejuízos ao uso pretendido e ao paciente.
- O uso contínuo ou prolongado de uma broca poderá causar desgaste na mesma e acarretar possíveis rupturas. De modo que, uma broca desgastada fatalmente deixará o procedimento cirúrgico mais

prolongado, podendo ainda causar necrose térmica devido ao aquecimento por fricção.

- Para bons resultados cirúrgicos e para evitar todo e qualquer perda do fio de corte, necrose térmica devido o aquecimento por fricção, arqueamento e risco de ruptura, utilizar sempre brocas novas a cada procedimento cirúrgico.
- O uso de irrigação durante a operação com brocas reduzirá a possibilidade à necrose térmica.
- Assegurar-se de que a broca esteja devidamente encaixada e travada na peça de mão antes de acionar o motor cirúrgico.
- Não tentar inserir ou remover a broca enquanto a peça de mão estiver em funcionamento.
- Pressão excessiva pode dobrar ou fraturar o instrumental, causando consequentemente danos ao tecido e/ou até perda do controle tátil, logo, recomenda-se não aplicar uma força pressão excessiva.
